WERE it possible to dedicate a sales book to a group of individuals, it would be our desire to dedicate this book to those visionary pioneers of American Horticulture who had the foresight and the courage to develop the bulb-growing industry in the United States in the face of what seemed an impossibility.

At a time like this, the approach to maturity of an infant American industry can be fully appreciated. Conditions in Europe have made it impossible for us to obtain and to list for sale a great many of the bulbs which are normally used by the American gardening public. However, we can offer with pride bulbs of very high quality that have been produced by American growers on American soil for American gardens.

* * * *

For the past decade the superiority of the American-grown Narcissus and other bulbous items, such as Iris, has been a well-known fact among the florists and commercial growers of America. Their earliness of bloom and their superior flowering qualities have raised them to such a high estate as to have practically eliminated entirely the use of imported bulbs of this type.

These commercial growers and florists have in the past five years demanded American-grown Darwin Tulips in increasing quantities because of their earliness of bloom and their all-round superiority.

We consider it a privilege to be able to offer these bulbs at this time and we are sure that you will also consider it a privilege to grow 100 per cent American-grown bulbs.

American-Grown DARWIN TULIPS

American-grown Tulips, grown in the Pacific Northwest, have earned the right to be listed first for we believe in "America first."

Following is a list of the finest American-grown Darwin Tulips—extra-choice top size—extra-early bloom—*longer blooming season*.

Baronne de la Tonnaye. Carmine-rose. Large, beautifully shaped flower and excellent color. 26 in.

***Bartigon.** Fiery scarlet. Strikingly beautiful. Will tone up any garden. 24 in.

Clara Butt. Salmon-rose. One of the finest. For years a "must" variety. 22 in.

Faust. Large; satiny purple. 30 in.

King Harold. Rich maroon. Very distinctive. 24 in.

Mr. Farncombe Sanders. Rosy scarlet, white center. Very vigorous grower. 25 in.

Pride of Haarlem. American-Beauty-rose. Enormous flower of excellent form. A universal favorite. 34 in.

***Princess Elizabeth.** Vivid rose-pink. A wonderful cut-flower. 26 in.

Rev. Ewbank. Bright vivid lilac, lighter margin. 23 in.

***William Copeland.** Early. Lavender. The only lavender available. Quantity limited. Use instead of Single Early Tulips. 25 in.

***William Pitt.** Very early. Glowing scarlet. Use instead of Single Early Tulips. 24 in.

Yellow Darwin (Inglescombe Yellow). Canary-yellow. An old favorite. Always satisfactory. 22 in.

Old Glory Mixture. A superb blend of the best shades and varieties.

\$1.00 per doz., \$7.00 per 100

*Best varieties for forcing.

All the above varieties, except where otherwise noted, \$1.35 per doz., \$10.50 per 100

Private Collectors' Varieties (very limited)

It has been our practice every year to plant out in our own grounds, for checking purposes, the new and better varieties of Tulips. Fortunately, last year we exercised this practice and the result is that we have an excellent stock of the new and rare varieties of bulbs which, although we cannot classify them as top size, will average 10 to 11 cm., a good second size that will be sure to bloom. These new and splendid varieties are not in sufficient quantity to list separately, therefore we have made a mixture of the most select among them. Fully 50 per cent of this mixture contains varieties that are worth 50c. each, or more.

American-Grown ... NARCISSI AND DAFFODILS

THERE is hardly a bulbous flower in existence that renders more joy and cheer to garden lovers than a planting of golden yellow bicolor and white Narcissi.

Our forefathers, the pioneers who settled in the United States, brought these lovely plants with them to insure the beauty and cheer they were accustomed to in their native lands. They have since proved a splendid investment, for the inhabitants of those sections of the country where these bulbs have become naturalized have found them to be a source of never-ending joy.

The varieties we offer are the descendants of these hardy pioneers of the Narcissus family, highly developed and selected for their beauty and vigor. All bulbs offered here are 100 per cent American-grown.

Lilies for June Gardens

Best planted as early in the fall as possible.

The following list embraces those known members of the Lily family whose beauty and hardiness has been firmly established by all garden lovers. It would be possible to issue a catalog on Lilies alone, and we are therefore, by necessity, forced to list only those which in our estimation are the best.

Lilium candidum MADONNA LILY

We can truthfully call these 100 per cent American-grown bulbs—the cream of the crop. Inasmuch as we realize that no garden is complete without these chaste white Madonna Lilies, we have expended every effort to provide a fine strong stock of these bulbs this year. Supply very limited.

SCHLING'S *famous* PANSY PLANTS

WE ARE offering, for the first time for *fall planting*, our sensational Majestic Splendor strain in strong, well-developed plants. These plants, from seeds sown this summer, have been especially grown and hardened. They may be set out in beds this fall, and thus have the advantage of spring-planted Pansy plants in that they are well developed with a strong root system by next spring and receive no check from transplanting at the time that they are intended to bloom.

We are certain that the satisfaction derived from a trial planting of these splendid plants will convert all Pansy enthusiasts to fall planting of these cheerful garden requisites.

We recommend that in the region of New York and farther north, protection be given them by either hilling the soil up to within an inch of the top of the plant, or else providing a protective mulch, such as *Cran-Cover*, salt-hay, or leaves.

Collection No. 1. 25 plants each in the following colors: Deep golden yellow, pure white, solid blue, and wine shades. 100 plants, **\$4.00.**

Collection No. 2. 25 plants each in the following colors: Yellow, corn-flower-blue, bronze, and royal purple. 100 plants, **\$4.00.**

Fall-Sown Lawns Are Best

FALL SOWING of grass seed insures an established lawn for next season. These are the lawns that usually remain green through the hot and dry summer due to the fact that their root system has had a chance to develop through the cool days of autumn and early spring.

Schling's Maxima Grass Seed Mixtures

A grass seed mixture may be offered under any brand name. However, regardless of the name, the basis of all good grass seed mixtures must necessarily be the same. The important feature of a good mixture is that it contains heavy, plump seeds from selected grass stocks that have been grown for the distinct purpose of seed production. Careful blending plays its part in the compounding of a high-class grass seed mixture. We have prided ourselves upon the super-quality of our grass seed mixtures which have established a reputation in the past 25 years.

Schling's Maxima Special Lawn Mixture. This mixture is especially designed for all ordinary lawn purposes. Weighing 32 pounds per bushel, its quality is sufficiently high to challenge the foremost brand mixtures offered by any seed-house. Lb. 65c., 2 lbs. \$1.25, 5 lbs. \$3.00, 10 lbs. \$5.50, 25 lbs. \$12.50, 100 lbs. \$45.00

Schling's Maxima Shady Nook Mixture. Years of successful usage have proved to us that our formula for this mixture is correct. This mixture will produce a rich, velvety greensward even in fairly dense shade. Lb. 80c., 2 lbs. \$1.50, 5 lbs. \$3.50, 10 lbs. \$6.50, 25 lbs. \$15.00, 100 lbs. \$55.00

CRAN-COVER. The plant blanket. Eminent horticulturists recommend the use of this splendid ground-cover as a protection for perennial, bulb and pansy beds. This cover allows for penetration of moisture, is free of weeds, and can be stored for use another year.

Schling's *Selected* PEONIES

IT IS a known fact that the only time to plant Peonies for really good results the first year is in the autumn. It is advisable to cover the top eye of these strong roots no more than 2 inches. Protection is rarely necessary, and, if used, should consist only of such covering as salt-hay or **Cran-Cover**.
